# Oleg Latypov

Engineering Manager | 10+ yrs building scalable systems  
West New York, New Jersey, United States

## Summary

I'm a Software Engineering Manager with 14+ years of experience delivering complex programs across cloud, web, and mobile platforms—and 5+ years leading cross-functional engineering teams through architectural transformation, AI adoption, and platform scaling.

At Blink Fitness (acquired by PureGym), I built the IT department from scratch—recruiting and mentoring 20+ engineers and establishing four high-performing teams across web, mobile, kiosk, and CMS platforms. I led the technical strategy and delivery for several critical programs:

- Migrated our legacy stack to a serverless AWS platform using Lambda, DynamoDB, and API Gateway
- Integrated Adyen as the enterprise-wide payment solution under tight compliance deadlines
- Introduced AWS Cognito for secure auth across all user-facing surfaces
- Led a CMS migration from WordPress to Yext for 120+ location pages

I'm also passionate about the intersection of AI and product experience. I designed and launched the Blink AI Personal Assistant—an OpenAI-powered fitness coach that delivers real-time recommendations for workouts and nutrition, combining front-end (Angular, TypeScript), backend (Node.js, GraphQL), and serverless cloud pipelines.

Certified in Generative AI (DeepLearning.AI) and UX Design (Google), I stay close to cutting-edge technologies while driving team culture rooted in autonomy, technical excellence, and clear program execution.

Currently exploring new opportunities as a Technical Program Manager or Engineering Manager, especially on teams building scalable platforms, AI-driven experiences, or developer tools.

Let's connect if you're tackling ambitious challenges or want to share ideas around architecture, AI, or high-performance teams.

---

## Experience

### PureGym

Software Engineering Manager

February 2025 - June 2025 (5 months)

New York City Metropolitan Area

### Blink Fitness

7 years 6 months

Software Engineering Manager

March 2021 - June 2025 (4 years 4 months)

New York, United States

- Led and scaled 4 cross-functional teams (20+ engineers) across web, mobile, and platform engineering; covering consumer, member, and internal applications.
- Set engineering OKRs and KPIs tied directly to company goals, reviewed quarterly with executive leadership to ensure transparency and accountability.
- Partnered with Product & Design to define multi-quarter roadmaps, translating business objectives into scalable technical solutions while reducing delivery risks.
- Improved engineering throughput by 25% by redesigning sprint workflows, optimizing backlog prioritization, and streamlining release pipelines.
- Built a career development framework mentored multiple engineers into senior and lead roles, improving retention and team maturity.
- Implemented a technical leadership program for tech leads, standardizing architecture review processes and promoting peer-led knowledge sharing.
- Directed enterprise-wide Adyen payment platform integration under compliance pressure, completed 20% ahead of schedule with zero post-release defects.
- Introduced AI-driven engineering workflows leveraged LLMs, OpenAI APIs, and Agent Development Kit (ADK) for Gemini for automated documentation,

unit test generation, and code scaffolding, reducing repetitive dev work by 30%.

- Balanced feature delivery with tech debt reduction, cutting legacy backlog by 80% without impacting roadmap commitments.
- Drove observability initiatives with DataDog, CloudWatch, and Grafana, reducing incident resolution time by 35% and improving SLA adherence.
- Promoted cross-team collaboration via regular architecture syncs, aligning web, mobile, and backend teams on shared libraries, coding standards, and integration patterns.

## Team Lead Software Architecture

January 2018 - March 2025 (7 years 3 months)

Greater New York City Area

- Led full decoupling from Equinox legacy infrastructure, implementing a unified TypeScript stack across front-end and back-end services.
- Designed scalable, modular UI components and shared libraries for multiple applications, reducing duplication and accelerating development.
- Architected AWS serverless solutions integrated with secure authentication (AWS Cognito) and optimized APIs for high traffic.
- Collaborated with product and UX teams to translate business needs into responsive, secure, and performant interfaces.

## CNBC

Lead Software Engineer

September 2017 - February 2018 (6 months)

Englewood Cliffs , United States

- Determined and executed new architecture for complex dashboards project for editorials and copywriters using Angular, Google Cloud Platform.
- Supervising a cross-functional engineering team by providing guides and documentation.
- Work closely with stakeholders to achieve requirements and fit into a timeframe.

## Sudler & Hennessey

Lead Software Engineer

May 2017 - September 2017 (5 months)

Greater New York City Area

- Collaborated with a team on implementing new features and new User Interface design in an Agile environment
- Recommend new product ideas and maintain records for potentially patentable ideas. Implemented plug-ins to extend application functionality

- Developed the front-end UI by using HTML5, CSS3, and JavaScript, taking advantage of the frameworks Angular

### Sudler & Hennessey

UX/UI Product Designer | Software Engineer

May 2016 - December 2016 (8 months)

Greater New York City Area

- Collaborated with team on implementing new features and UX in an Agile environment
- Suggest new product ideas and maintain records for potentially patentable ideas
- Implemented plug-ins to extend application functionality
- Developed the front-end UI by using HTML5, CSS3, and JavaScript, taking advantage of the frameworks Angular.JS
- Estimated time to develop for all approved prototypes and the implementation of those prototypes as well as showing to project leads and receiving and implementing any changes or implementation updates

### NYDVS

Director Of Engineering

May 2013 - August 2016 (3 years 4 months)

1002 Quentin Road, ste 2001 Brooklyn, NY 11223

- Managed multiple teams of web/mobile engineers, graphic designers, PMs.
- Managed engineering projects end-to-end
- Introduced Scrum to an organization. Created a predictable release schedule based on the release window.
- Sketched wireframes, user flows, and hi-res comps for various projects spanning desktop, mobile apps.
- Design strategies for future development projects based on the company's overall objectives and resources
- Web/Mobile apps time and cost estimation cost control reduction.
- Design strategies for future development projects based on the company's overall objectives and resources

### Ruckus Marketing

Senior Frontend Engineer

September 2011 - April 2013 (1 year 8 months)

- Front end web development using HTML 5, CSS3, JavaScript, jQuery, Responsive layouts

- Back end web development using PHP, OOP, MySQL, MVC, Codeigniter Framework
- Open Source development: Wordpress, Drupal, Joomla, Open Cart, Magento, etc. ...
- Database architecture.
- QA, cross browsers testing.

---

## Education

### Kaliningrad State Technical University

Bachelor's degree, Mechanical Engineering · (September 2004 - May 2006)

### Kaliningrad Marine College

Bachelor of Engineering - BE, Electrical, Electronic and Communications Engineering Technology/Technician · (2001 - 2004)
